Group Information

Abdul Matin Group stands as one of the early pillars of Bangladesh's modern construction industry. Established in 1979, at a time when the country was still strengthening its physical and economic foundation, the company entered the market with a clear and focused vision: to build durable, large scale infrastructure for both government and private sector clients. From its inception, Abdul Matin concentrated exclusively on construction projects, positioning itself as a pioneer in the sector through technical capability, disciplined execution, and long term reliability.

A Pioneer in Construction

In the late 1970s and early 1980s, Bangladesh's infrastructure development was gaining momentum. Abdul Matin Group emerged during this critical phase and quickly earned recognition for its ability to undertake challenging civil engineering works. With a strong leadership foundation and a skilled workforce, the company built a reputation for delivering projects on time while maintaining structural integrity and compliance with national engineering standards.

Over the decades, Abdul Matin Group has contributed significantly to national development. Its portfolio reflects deep involvement in public sector projects across various districts of Bangladesh. The company became widely known for its role in constructing government facilities that directly serve communities.

One of its most notable achievements is the development of more than 50 percent of the Guest Houses, Porjoton Motels, and Union Health Complexes in different districts across Bangladesh. These facilities have played a vital role in promoting domestic tourism, supporting administrative activities, and strengthening grassroots healthcare infrastructure. The scale and reach of these projects demonstrate the company's operational strength and its trusted relationship with government authorities.

Diversified Construction Capabilities

Beyond hospitality and healthcare infrastructure, Abdul Matin Group has successfully completed a wide range of heavy civil engineering and infrastructure projects, including:

- Road and highway construction
- Bridge works
- Water dams and water control structures
- Water embankment works
- Dredging operations
- Public buildings and institutional structures
- Private sector construction developments

The company's experience in water-related infrastructure, such as embankments and dredging works, reflects its understanding of Bangladesh's geographical and environmental realities. These projects have contributed to flood control, river management, and agricultural sustainability in multiple regions.

Through decades of continuous operation, Abdul Matin Group has developed a strong internal system of project management, quality control, and technical supervision. Its long-standing presence in the market is not only a result of completing projects, but of building credibility and trust with stakeholders, contractors, engineers, and government bodies.

Commitment to National Development

What distinguishes Abdul Matin Group is its focused commitment to national infrastructure growth. While many companies diversified early, Abdul Matin remained fully concentrated on construction, refining its expertise and expanding its project capacity. This strategic focus enabled the company to develop deep technical knowledge and operational efficiency in large-scale civil engineering works.

The organization's contribution to rural and semi-urban development has been particularly impactful. By constructing union-level health complexes and public facilities, the company has directly supported essential services at the grassroots level.

Future Vision and Expansion Plans

Looking ahead, Abdul Matin Group is preparing for a new phase of growth. Once sufficient funding is achieved and consolidated, the company intends to strategically expand into complementary sectors beyond construction. Planned future investments include:

- Commodity product imports
- Raw materials imports
- Solar power project development
- Shipping and maritime-related works

These sectors have been selected to align with national demand trends and long-term economic sustainability. The company aims to leverage its project management expertise and operational experience to build a diversified business portfolio while maintaining its strong foundation in construction.

In conclusion, Abdul Matin Group is not just a construction company established in 1979; it is a pioneering force that has played a significant role in shaping Bangladesh's infrastructure landscape. With decades of proven performance in government and private sector projects and a clear roadmap for strategic diversification, the company stands ready to enter its next chapter of growth while continuing its legacy of nation-building.

I. Company Overview & Heritage

Abdul Matin Group stands as a pioneering and preeminent name in the construction industry of Bangladesh. Since its inception in **1979**, the group has built a legacy of excellence, integrity, and unparalleled quality over nearly four and a half decades of operation. As one of the oldest and most well-known firms in the sector, the company has been an integral partner in the infrastructural development of the nation.

Once recognized as a true pioneer in the construction landscape, Abdul Matin Group continues to uphold its reputation for reliability and expertise. Through generations of successful project execution, the firm has evolved into one of the most influential and trusted construction conglomerates in Bangladesh.

II. Our Expertise & Core Services

With a deep-rooted history and a commitment to modern engineering, we specialize in delivering large-scale infrastructure projects across several key sectors:

- **Roads & Highways:** We possess extensive experience in constructing national and regional highway networks.
- **Bridge Construction:** We maintain high proficiency in executing complex engineering structures and bridges.
- **Building Construction:** We focus on the development of residential, commercial, and specialized architectural projects.
- **Hospital Construction:** We provide state-of-the-art infrastructure specifically for the healthcare sector.
- **River Bank Development:** We offer sustainable solutions for river training and bank protection.

Our team of veteran engineers and professionals is dedicated to completing every project on schedule while maintaining the highest international standards of safety and quality.

III. Technical Capacity: Dredging & Marine Fleet

As part of our commitment to **River Bank Development**, Abdul Matin Group operates a robust fleet of high-capacity dredging machinery. This equipment is essential for river training, land reclamation, and large-scale water management projects.

Cutter Suction Dredgers (CSD)

We utilize a versatile range of dredgers to handle diverse geographical terrains:

- **18-Inch Heavy-Duty Dredger:** Optimized for deep-river dredging and large-scale sand extraction.
- **14-Inch Standard Dredger:** Our primary asset for mid-range canal and river development.
- **12-Inch Compact Dredger:** Specialized for precision work in smaller waterways and urban drainage.

Environmental Specialization

Our fleet is categorized by specialized utility to ensure efficiency in different water conditions:

- **Sweet Water Dredging Units:** Specifically tuned for inland river systems and freshwater lakes.
- **Salt Water Dredging Units:** Reinforced with corrosion-resistant components for coastal and estuarine projects.

IV. Governance: Board of Directors

Following our updated corporate structure, the **Board of Directors** oversees all strategic operations. This section includes comprehensive information regarding our leadership, including their professional backgrounds and Income Tax Certificates.

- **Leadership Integrity:** Each member of the board is fully authorized and empowered to manage the group's obligations.
- **Compliance:** Our leadership ensures that all operations adhere to national legal requirements, including value-added tax and payroll tax obligations.

V. Some of the Completed Projects from the Bunch

Since 1979, the group has successfully executed a vast array of high-priority infrastructure projects. Notable completions include:

- **National Highway Expansion:** Completed major regional stretches that improved national connectivity.
- **Specialized Healthcare Facilities:** Delivered modern hospital complexes equipped with advanced infrastructure.
- **River Training Initiatives:** Successfully implemented protection measures to manage water flow and prevent erosion.
- **Marine Shoreline Protection:** Executed saltwater protection projects using specialized equipment.

VI. Core Machinery & Equipment Specifications

The following table outlines the technical capacity of Abdul Matin Group's primary construction and dredging fleet. This inventory is meticulously maintained to meet the highest international standards of safety and performance.

Category	Equipment Description	Primary Utility	Specialized Features
Heavy Dredging	18-Inch Cutter Suction Dredger (CSD)	Deep-river dredging and large-scale sand extraction.	High-torque cutter head for compacted soil and deep-water reach.
Standard Dredging	14-Inch Cutter Suction Dredger (CSD)	Mid-range canal and river development.	Versatile workhorse for inland waterway maintenance.
Precision Dredging	12-Inch Compact Dredger	Urban drainage and narrow waterway precision work.	High maneuverability in restricted access areas.
Marine Systems	Sweet Water Dredging Units	Inland river systems and freshwater lakes.	Optimized for low-salinity environments.
Marine Systems	Salt Water Dredging Units	Coastal and estuarine projects.	Reinforced with specialized corrosion-resistant alloys.
Earthmoving	Heavy Excavators & Bulldozers	Shoreline shaping and land reclamation.	High-capacity buckets for rapid material movement.
Logistics	Support Tugs & Barges	Material transport and dredger positioning.	Enhanced stability for heavy-load marine transport.
Infrastructure	Roads & Highways Paving Fleet	National and regional highway construction.	Precision leveling and high-durability surfacing technology.

VII. Strategic Maintenance & Compliance

- **Technical Support:** All machinery is operated by certified technicians and veteran engineers to ensure project timelines are met.
- **Safety Standards:** Every unit in our fleet undergoes rigorous periodic inspections to comply with international safety and environmental regulations.
- **Pre-Approved Expenses:** As per our standard operational agreements, all necessary machinery maintenance and mobilization costs are documented for full transparency.

VIII. Project Management: Timelines & Strategic Milestones

Abdul Matin Group employs a structured approach to project execution, ensuring that every phase—from initial dredging to final road surfacing—is completed with precision and professional oversight. Our management framework is designed to handle the complexities of both "Sweet Water" and "Salt Water" environments while maintaining strict adherence to safety and quality standards.

Phase 1: Mobilization & Site Preparation

- **Initial Survey:** Conducting detailed hydrographic and topographic surveys to determine dredging depths and soil composition.
- **Fleet Deployment:** Strategic mobilization of the 18-inch, 14-inch, or 12-inch Cutter Suction Dredgers (CSD) based on project scale and water type.
- **Environmental Compliance:** Ensuring all pre-approved environmental safeguards and site-specific safety protocols are active.

Phase 2: Core Execution & Dredging Operations

- **Dredging & Reclamation:** Execution of sand extraction and canal deepening using our high-capacity dredging fleet.
- **River Bank Protection:** Implementation of sustainable solutions for river training and shoreline bank protection.
- **Material Management:** Utilizing our support tugs and barges for efficient transport and land reclamation activities.

Phase 3: Civil Construction & Infrastructure

- **Structural Development:** Commencing bridge engineering or building construction once the foundation and land reclamation are finalized.
- **Roads & Highways Paving:** Deploying our specialized paving fleet for national or regional highway networks.
- **Healthcare Infrastructure:** Integrating specialized systems for hospital projects to meet modern healthcare standards.

Phase 4: Final Implementation & Handover

- **Testing & Quality Assurance:** Rigorous final implementation checks, including debugging of technical systems and store-level approvals where necessary.
- **Documentation & Training:** Providing all necessary technical documentation and training for the client's operational team.

- **Final Implementation:** The project is officially handed over following successful completion of all agreed-upon milestones and final inspections.

IX. Performance Guarantee

As an independent contractor with a legacy dating back to **1979**, we guarantee that our veteran engineers and directors will oversee every milestone. Our commitment to the **Work Product** ensures that all results, systems, and information developed during the project remain the sole and exclusive property of the client.

X. Strategic Partnership Statement

As a **pioneer** in the construction landscape since **1979**, Abdul Matin Group is committed to defining the respective rights and duties of all services performed to ensure mutual success. Whether your project requires **18-Inch Heavy-Duty Dredging**, complex **Bridge Engineering**, or large-scale **Roads & Highways** development, our veteran team is prepared to deliver excellence.

Authorized Representation

- Our **Board of Directors** is fully empowered to enter into agreements and ensure that all contractual obligations are met without violating any laws or governmental regulations.
- We maintain strict **Confidential Information** protocols to protect the intellectual property and technical affairs of our partners.

XI. Formal Closing

IN WITNESS WHEREOF, Abdul Matin Group continues to build the infrastructure of tomorrow with the integrity of the past. We look forward to discussing how our four decades of experience can bring your next vision to life.

XII. Conclusion

Abdul Matin Group remains a steadfast pillar of the construction and engineering landscape in Bangladesh. Our journey, spanning over four decades, is a testament to our unwavering commitment to quality and national development. We invite you to partner with us as we continue to build a stronger and more sustainable Bangladesh.

Message from the Chairman

Since its establishment in 1979, Abdul Matin Group has been committed to contributing to the physical and economic development of Bangladesh through quality construction and infrastructure development. What began as a focused construction initiative has gradually grown into a respected and reliable organization that has participated in numerous government and private sector projects across the country.

From the very beginning, our vision was clear to build strong, durable, and meaningful infrastructure that serves communities and supports national progress. Over the decades, Abdul Matin Group has had the privilege of participating in many important public development projects. Our work spans across multiple districts of Bangladesh, including the development of government guest houses, Porjoton Motels, government guest houses, Porjoton Motels, Union Health Complexes, roads, bridges, water dams, embankments, dredging works, and other essential infrastructure. One of our proudest achievements is our contribution to the development of hospitality and healthcare infrastructure across the nation. Throughout our long journey, Abdul Matin Group has developed more than fifty percent of the Guest Houses, Porjoton Motels, and Union Health Complexes constructed in different districts of Bangladesh.

These projects continue to play a vital role in supporting tourism, administrative functions, and grassroots healthcare services for communities nationwide.

Our success over the years has been built on a foundation of integrity, technical expertise, professional management, and a deep commitment to delivering quality work. The trust we have earned from government institutions, project authorities, engineers, and partners has been our greatest asset. Every project we undertake reflects our dedication to maintaining high standards of engineering, safety, and timely execution.

Our future investment plans include commodity product imports, raw materials imports to support national industries, solar power project development to contribute to renewable energy initiatives, and shipping and maritime-related works to support trade and logistics. These sectors have been carefully identified based on long-term national demand and economic growth potential.

We believe that by combining our decades of project management experience with new investment opportunities, Abdul Matin Group can continue to play a meaningful role in Bangladesh's development in the years ahead.

On behalf of the Board of Directors, I extend my sincere gratitude to our partners, clients, engineers, employees, and well-wishers who have supported us throughout this journey. With continued dedication, innovation, and collaboration, we remain committed to building a stronger future for our organization and for our nation.

Chairman

Abdul Matin Group
Building the Nation Since 1979
Committed to Infrastructure & Development
Moving Towards a Diversified Future

BRIEF OVERVIEW

Abdul Matin Group (AMG) is a diversified Bangladesh-based conglomerate with strategic investments across Government constructions and infrastructure developments, Textiles, Power Generation, Real Estate, and Industrial Manufacturing. The Group operates through structured subsidiaries and maintains a long-term capital deployment strategy focused on scalable industrial assets and sustainable returns.

1. Investment Highlights:

Diversified Revenue Base
AMG operates across multiple high-growth sectors, reducing concentration risk and ensuring revenue stability.

Scalable Industrial Model
Established operational infrastructure allows for rapid capacity expansion without proportional cost escalation.

Strong Banking Relationships
Long-standing relationships with national and international financial institutions support structured financing and project execution.

Export-Oriented Manufacturing Strength
Participation in Bangladesh's textile and apparel supply chain provides foreign currency earnings and global market integration.

Energy Sector Exposure
Involvement in independent power production strengthens recurring revenue streams and long-term asset stability.

2. Core Business Segments:

Government Constructions & Infrastructure Development:

A. Transportation Infrastructure

- National highways and expressways
- Bridges and flyovers
- Rail infrastructure and logistics corridors
- Inland port and river terminal development
- Airport support infrastructure

These projects enhance connectivity and economic mobility.

B. Urban Development & Public Buildings

- Government administrative complexes
- Public housing schemes
- Municipal infrastructure
- Smart city initiatives
- Public utility buildings

Supports structured urbanization and public service delivery.

C. Water & Environmental Infrastructure

- Water treatment plants
- Sewerage and drainage systems
- Waste management facilities
- Effluent Treatment Plants (ETP)
- Environmental compliance infrastructure

Ensures sustainable development and environmental protection.

D. Industrial & Economic Zones

- Government-approved industrial parks
- Special Economic Zones (SEZ)
- Export Processing Zones (EPZ)
- Industrial utility infrastructure
- Factory and warehouse development

Promotes foreign investment and export-led growth.

E. Social Infrastructure

- Educational institutions
- Hospitals and healthcare facilities
- Training centers
- Community development projects

Enhances human capital and social development.

F. Real Estate & Mixed-Use Development (Public Sector Collaboration)

- Government land development projects
- Residential townships under PPP
- Commercial complexes in partnership with public authorities
- Integrated development projects

3. Financial Strength & Strategy

- Multi-sector revenue diversification
- Asset-backed growth model
- Structured leverage management
- Focus on reinvestment and capacity expansion
- Emphasis on operational efficiency and margin preservation

AMG follows a disciplined capital allocation strategy, balancing growth initiatives with financial sustainability.

4. Growth Outlook

Bangladesh's expanding economy, industrialization, and urbanization trends provide strong tailwinds for AMG's sectors. Future growth drivers include:

- Increased power demand
- Textile export expansion
- Industrial zone development
- Infrastructure modernization
- Real estate demand growth

The Group remains positioned to capitalize on both domestic demand and export market opportunities.

5. Investment Proposition

Abdul Matin Group offers investors exposure to:

- Industrial manufacturing scale
- Infrastructure and power assets
- Real estate capital growth
- Diversified sector participation
- Long-term sustainable returns

BANK FINANCING PROPOSAL SUMMARY

1. Executive Summary

Abdul Matin Group (AMG) seeks structured bank financing to support expansion across its core industrial and infrastructure segments, including textiles, power generation, real estate development, and industrial manufacturing.

The proposed financing will be deployed for capacity expansion, working capital support, infrastructure development, and strategic asset acquisition, aligned with the Group's long-term growth strategy.

2. Financing Requirement

Purpose of Facility:

- Industrial capacity expansion
- Machinery procurement and plant modernization
- Power and infrastructure project development
- Real estate project construction
- Working capital enhancement

Proposed Facility Structure:

- Term Loan (Medium to Long Term)
- Working Capital Facility (Revolving)
- Project Financing (Structured/IPP-based where applicable)
- LC/Import Financing (for raw materials and capital machinery)

Indicative Tenure: 5–10 years (depending on project type)
Repayment Mode: Structured amortization aligned with project cash flow

3. Business Strength & Credit Rationale

Diversified Revenue Portfolio

AMG operates across multiple sectors, reducing concentration risk and ensuring stable cash flow generation.

Asset-Backed Operations

The Group maintains substantial fixed assets, industrial plants, and real estate holdings, strengthening collateral coverage.

Established Banking Track Record

Long-standing relationships with financial institutions demonstrate repayment discipline and financial transparency.

Predictable Revenue Streams

- Export-based textile operations
- Power purchase agreement-backed energy projects
- Structured real estate development cycles

4. Financial Position (Indicative Strengths)

- Strong revenue growth trajectory
- Controlled cost structure
- Improving operational margins
- Structured leverage management
- Consistent reinvestment strategy

Projected growth in revenue and operating profit supports debt servicing capacity.

5. Risk Mitigation

- Diversified sector exposure
- Long-term supply and power agreements
- Experienced management team
- Collateral-backed lending structure
- Conservative financial planning

6. Security & Collateral (Indicative)

- Land and industrial plant assets
- Machinery and fixed assets
- Project receivables (where applicable)
- Corporate guarantees
- Hypothecation of inventory and receivables

7. Repayment Source

Primary repayment sources include:

- Operational cash flow from textile and manufacturing units
- Contract-backed revenue from power projects
- Real estate project sales proceeds
- Export earnings

Secondary repayment source:

- Asset liquidation value

8. Conclusion

Abdul Matin Group presents a structured, asset-backed, and diversified financing opportunity with scalable growth potential and strong cash flow fundamentals. The proposed facility will enhance industrial capacity, strengthen infrastructure capabilities, and accelerate long-term revenue expansion while maintaining prudent financial discipline.

SWOT ANALYSIS

STRENGTHS

1. Diversified Business Portfolio
Operations across textiles, power generation, infrastructure, real estate, and manufacturing reduce sector-specific risk and enhance revenue stability.

2. Asset-Backed Industrial Base
Ownership of industrial plants, land banks, machinery, and infrastructure projects strengthen balance sheet security and financing capability.

3. Established Banking Relationships
Long-standing relationships with financial institutions improve access to structured financing and project funding.

4. Export-Oriented Textile Operations
Participation in export markets supports foreign currency earnings and integration into global supply chains.

5. Energy Sector Participation
Involvement in power generation projects provides recurring, contract-backed revenue streams and long-term asset stability.

6. Experienced Management
Leadership with sectoral experience enhances operational efficiency and strategic expansion planning.

WEAKNESSES

1. Capital-Intensive Operations
Industries such as power, infrastructure, and manufacturing require high upfront capital and ongoing financing.

2. Exposure to Debt Financing
Expansion strategies may increase leverage, impacting financial ratios if not carefully managed.

3. Sectoral Complexity
Diversification across multiple industries may increase operational complexity and management challenges.

4. Margin Sensitivity in Textiles
Export-based textile operations are vulnerable to global pricing pressure and raw material volatility.

OPPORTUNITIES

1. Industrial Expansion in Bangladesh
Growing industrialization and infrastructure demand create expansion opportunities across core sectors.

2. Rising Energy Demand
Increasing electricity consumption supports long-term power generation investments.

3. Real Estate Growth
Urbanization and middle-class expansion drive demand for residential and commercial development.

4. Export Market Diversification
Entry into new international markets can enhance textile and manufacturing growth.

5. Strategic Partnerships & Joint Ventures
Collaboration with foreign investors or institutional partners may accelerate capital growth and technology transfer.

6. Infrastructure Modernization Initiatives
Public-private partnership (PPP) projects offer potential participation in national development programs.

THREATS

1. Regulatory & Policy Changes
Changes in energy tariffs, import duties, or export incentives may affect profitability.

2. Interest Rate Fluctuations
Rising borrowing costs could impact debt servicing capacity.

3. Global Market Volatility
Textile exports are sensitive to international demand cycles and currency fluctuations.

4. Energy Supply Risk
Gas or fuel shortages may affect power and industrial operations.

5. Competitive Market Pressure
Increasing competition in real estate and manufacturing sectors may compress margins.

STRATEGIC POSITION SUMMARY

Abdul Matin Group demonstrates strong industrial diversification, asset-backed stability, and scalable growth potential. While capital intensity and market volatility pose challenges, structured financial management, sector diversification, and strategic expansion positioning provide resilience and long-term value creation capability.

INVESTMENT RISK MATRIX

The following matrix evaluates key investment risks based on **Likelihood** and **Impact**, providing a structured view for financial institutions and investors.

Risk Category	Risk Description	Likelihood	Impact	Overall Risk Level	Mitigation Strategy
Financial Risk	High leverage due to capital-intensive expansion	Medium	High	High	Structured debt planning, staggered financing, maintaining DSCR buffer
Interest Rate Risk	Rising borrowing costs affecting profitability	Medium	Medium–High	Medium–High	Fixed-rate borrowing mix, refinancing strategy
Market Risk (Textile Export)	Global demand fluctuation & price pressure	Medium	High	High	Market diversification, long-term contracts
Operational Risk	Multi-sector operational complexity	Medium	Medium	Medium	Strong governance, professional management systems
Regulatory Risk	Policy changes in power, taxation, import/export	Low–Medium	High	Medium	Regulatory compliance team, policy monitoring
Energy Supply Risk	Fuel/gas supply disruptions	Low–Medium	Medium–High	Medium	Diversified energy sourcing, backup planning
Real Estate Market Risk	Demand slowdown or liquidity tightening	Medium	Medium	Medium	Phased project development, pre-sales strategy
Currency Risk	Exchange rate volatility impacting imports/exports	Medium	Medium	Medium	Natural hedge via export earnings
Liquidity Risk	Delays in receivables or project cash inflow	Low–Medium	Medium	Medium	Working capital optimization

High Impact – High/Medium Likelihood

- Financial leverage risk
- Export market volatility

Medium Impact – Medium Likelihood

- Real estate demand fluctuation
- Interest rate changes
- Currency fluctuation

HIGH IMPACT – LOW/MEDIUM LIKELIHOOD

- Regulatory changes
- Energy supply disruption

OVERALL RISK PROFILE ASSESSMENT

- **Risk Nature:** Moderate to Moderately High (typical for diversified industrial conglomerate)
- **Mitigation Capacity:** Strong due to asset backing, sector diversification, and structured financing
- **Investor Suitability:** Appropriate for medium- to long-term investors seeking industrial and infrastructure exposure

STRATEGIC RISK MANAGEMENT PRIORITIES

1. Maintain conservative debt-to-equity ratio
2. Strengthen long-term power and export contracts
3. Diversify export destinations
4. Phase large real estate developments
5. Optimize capital structure annually

Managing Director

PRIVATE COMPANY

3. The Company is a Private Limited Company within the meaning of Section 2(1) under clause (q) of the Companies Act, 1994 and accordingly the following shall apply:-
   a. No invitation shall be issued to the public to subscribe for any share or debenture of the Company.
   b. The number of Members of the Company (exclusive of the persons who are in the employment of the Company) shall be limited to fifty only: Provided However that when two or more persons hold one or more shares jointly in the Company, they will be treated as a single member : and
   c. The right to transfer of shares of the Company is restricted in the manner and to the extent hereinafter provided.

4. The Company shall be entitled to commence business from the date of its incorporation.

SHARE CAPITAL

5. The Authorized share capital of the Company is Tk. 5,00,00,000/-(Five Crore) divided into 5,00,000 (Five lac) Ordinary Shares of Tk. 100/-(One hundred) each with powers to increase and reduce the capital of the Company for the time being in accordance with the provisions of the Companies Act of 1994.

6. The shares of the Company shall be under the control of the Directors, who may allot and issue the shares to such persons in accordance with the decision arrived at a meeting of the Board of Directors.

7. Every person applying for shares of the Company shall specify his name, address and occupation to be entered in the register of members, such address shall be deemed to be his place of residence to which all notices from the Company shall be sent and the Company will not be responsible to any member for the non-receipt of any notice for the non-payment of dividends or for any other matter due to the change of address of any member unless such change of address is notified in writing to the Company.

CALL ON AND FORFEITURE OF SHARES

8. The joint holders of shares shall be individually as well as jointly liable for the payment of any call or installment due in respect of the share held by them.

9. The Directors may from time to time, make call upon the members in respect of any money remaining unpaid on the shares held by them and no call shall be less than twenty five percent of the nominal value of the share and each member shall subject to receive fourteen days notice specifying the time and place of payment, pay to the Company the amount called on his share at the time and place so specified in the notice, if the requirement of the notice as aforesaid is not complied with any share in respect of which the notice has been given may at any time there after be forfeited by a resolution of the Board of Directors to that effect.

Managing Director
Abul Matin Ltd.

10. The forfeited share may be sold or otherwise disposed of in such manner as the Directors may think fit and at any time before sale or disposal, the forfeiture may be cancelled in such manner and on such terms and conditions as the Directors may think fit.

SHARE CERTIFICATE

11. Every person whose name is entered in the Register of Members shall be entitled to one or more share certificates to be issued under the common seal of the Company, specifying the number of share or shares and denoting number of shares held by him and the amount paid up thereon, provided that in respect of share or shares held by several persons jointly the Company shall not be bound to issue more than one certificate and the delivery of such certificate to one of the several joint holders, preferably to the one whose name stands first in the Register of Members shall be sufficient delivery to all. If a share certificate is defaced, lost or destroyed it may be re-issued on such terms and conditions as the Directors may think fit. Share Certificate shall be signed by the Managing Director and any one Directors of the Company.

TRANSFER AND TRANSMISSION OF SHARE

12. No shares shall be transferred to any person who is not a member of the company as long as any existing member is to willing to purchase the same. At first the Managing Director will prefer to purchase those transfer of shares. The transfer shall be made at such price as shall be determined by the Board. No transfer shall be made to an infant or person of unsound mind or any person punished by the Court. The share of the Company shall be transferred in the usual common Form or in any other Form as may be approved by the Directors.

Managing Director
Abdul Matin Ltd.

13. The instrument of transfer of any share of the Company shall be executed both by the transferor and the transferee and lodged at the registered office of the Company along with the share certificate. The transferor shall be deemed to remain as the holder of this Share until the name of the transferee is entered in the Register of Members.

14. The legal heirs, successors, executors, administrators or assigns of a deceased sole holder of a share shall be the only person recognised by the Company having any title of the share.

15. Any person entitled to a share in consequence of death or insolvency of a member shall upon such evidence being produced as may be required by the Directors, have the right to be registered as a member in respect of that share.

Register of Joint Stock Companies

POWER OF DIRECTORS

38. The business of the Company shall be managed by the Directors who may pay all expenses incurred for the formation and registration of the Company and may exercise all such powers of the Company as are not forbidden by the Companies Act, 1994 or any statutory modification or reenactment thereof for the time being in force or by the Articles required to be exercised by the Company in general meeting, subject nevertheless to any regulation being not inconsistent with the aforesaid regulations or provisions as may be prescribed by the Company in general meeting But no regulations made by the Company in general meeting shall invalidate any prior act or acts of the Directors which would have been valid if that regulation had not been made.

DISQUALIFICATION OF DIRECTORS

39. The office of a Director shall be vacated if the Director :

a. Fails to obtain the time as specified under Section 97 (i) of the Companies Act, 1994 or at any time thereafter ceases to hold the share qualification necessary for his/her appointment : or

b. If found to be a person of unsound mind by a court of competent Jurisdiction : or

c. If an adjudged insolvent: or

d. Absent himself/herself from three consecutive meetings of the Directors or from all meetings of the Directors for a continuous period of three months whichever is longer without leave of absence from the Board of Director : or

e. Voluntarily resign from the office.

40. The Directors shall meet together for the dispatch of business of the Company adjourn or otherwise regulate their meeting as they may think fit.

QUORUM

41. A meeting of the Directors at which a quorum is present shall be competent to exercise all or any of the powers and authorities of the Directors. Unless otherwise determined **Three Directors** shall form the quorum of a Directors meeting.

42. Any resolution or circular signed by all the Directors shall be as valid and effectual as if it has been passed at a meeting of the Directors duly called and constituted.

43. The Directors may at any time call a meeting of the Board of Directors. They may also elect one of them to be the Chairman of the Company in a vacant post.

44. All acts done at a meeting of the Directors shall, notwithstanding that it was afterwards discovered that there was some defects in the appointment of such Directors or that they or any one of them were disqualified to be a Director be as valid and effectual as if every such person had duly been appointed and was duly qualified to be a Director. Provided that nothing

Work Certificate

Certificate for successful completion and commissioning & works in a single tender

Memo No: HSTU/Engr-435/ 168

Date: 22/11/2017

01. Particular of the Officer issuing certificate :

a)	Name	: Md. Chand Ali
b)	Designation	: Superintending Engineer
c)	Office Address	: Hajee Mohammad Danesh Science and Technology University, Dinajpur
d)	Telephone No	: 0531-51737
e)	Fax No	: 0531-61311

02. Particulars of the Contractor/Firm

a)	Name	: Abdul Matin Limited
b)	Address	: 25/1, East Nayatola, Mogbazar, Dhaka-1217
c)	Telephone/Mobile No	: 01711-932933
d)	Fax No:	

03. Description of the Work:

a)	Name of the Work	: Construction of 3-Storied Library Building (Bhaban-1 & 2) (Package-A) at Hajee Mohammad Danesh Science & Technology University, Dinajpur
b)	Location of the Work	: Hajee Mohammad Danesh Science and Technology University, Dinajpur
c)	Number of storied/floor of building	: 3-Storied with 5-storied foundation
d)	Plinth area per floor	: 8600 SFT
e)	Type of foundation	: Combined Footing

04. Incase of joint Venture:

a)	Leading Firm	: Not Applicable
b)	Participation Percentage	: Not Applicable

05. Full particulars of the department/ Division under which the work has been executed. : Engineering Section, Hajee Mohammad Danesh Science and Technology University, Dinajpur

06. Tender Value of the work : **Tk. 6,10,00,000.00**

07. Total bill amount as per final bill : Tk. **6,07,02,680.42**

a)	Building work	: Tk. 5,64,45,199.92
b)	Water supply and Sanitary work	: Tk. 13,33,380.50
c)	Electrical work	: Tk. 29,24,100.00
d)	Air conditioning work	: ----

08. Memo and date of work order (copy of work order attested by certificate issuing officer to be Attested) : HSTU/Engr-435/411, Date: 06-04-2014

09. Date of completion : 03-04-2015

10. Time allowed for completion of the work : 12 (Twelve months)

11. Comments about overall performance of the contractor/Firm : The quality of work is highly satisfactory. The firm is technically sound. They are financially solvent. The firm is well-equipped and capable of construction and type of multi-storied building.

Some of Our Completed Project

Some of the Completed Projects from the Bunch

Since **1979**, Abdul Motin Group has successfully executed a vast array of high-priority infrastructure projects across Bangladesh. Below is a curated selection of notable completions that demonstrate our capacity for excellence:

1. Roads & Highways Infrastructure

A. **National Highway Expansion:** Completed several major stretches of regional and national highways, improving connectivity and logistics.
B. **Urban Road Networks:** Developed comprehensive road systems within key industrial and commercial zones.

2. Specialized Bridge Engineering

A. **Regional Connectivity Bridges:** Constructed multiple medium-to-large-scale bridges, overcoming complex geographical and hydraulic challenges.
B. **Steel & Concrete Structures:** Implemented durable bridging solutions designed for heavy-duty industrial transport.

3. Civil & Healthcare Facilities

A. **Modern Hospital Complexes:** Delivered state-of-the-art specialized hospital buildings equipped with modern medical infrastructure.
B. **Governmental & Institutional Buildings:** Built high-capacity Residential, Administrative and Educational facilities across various districts.

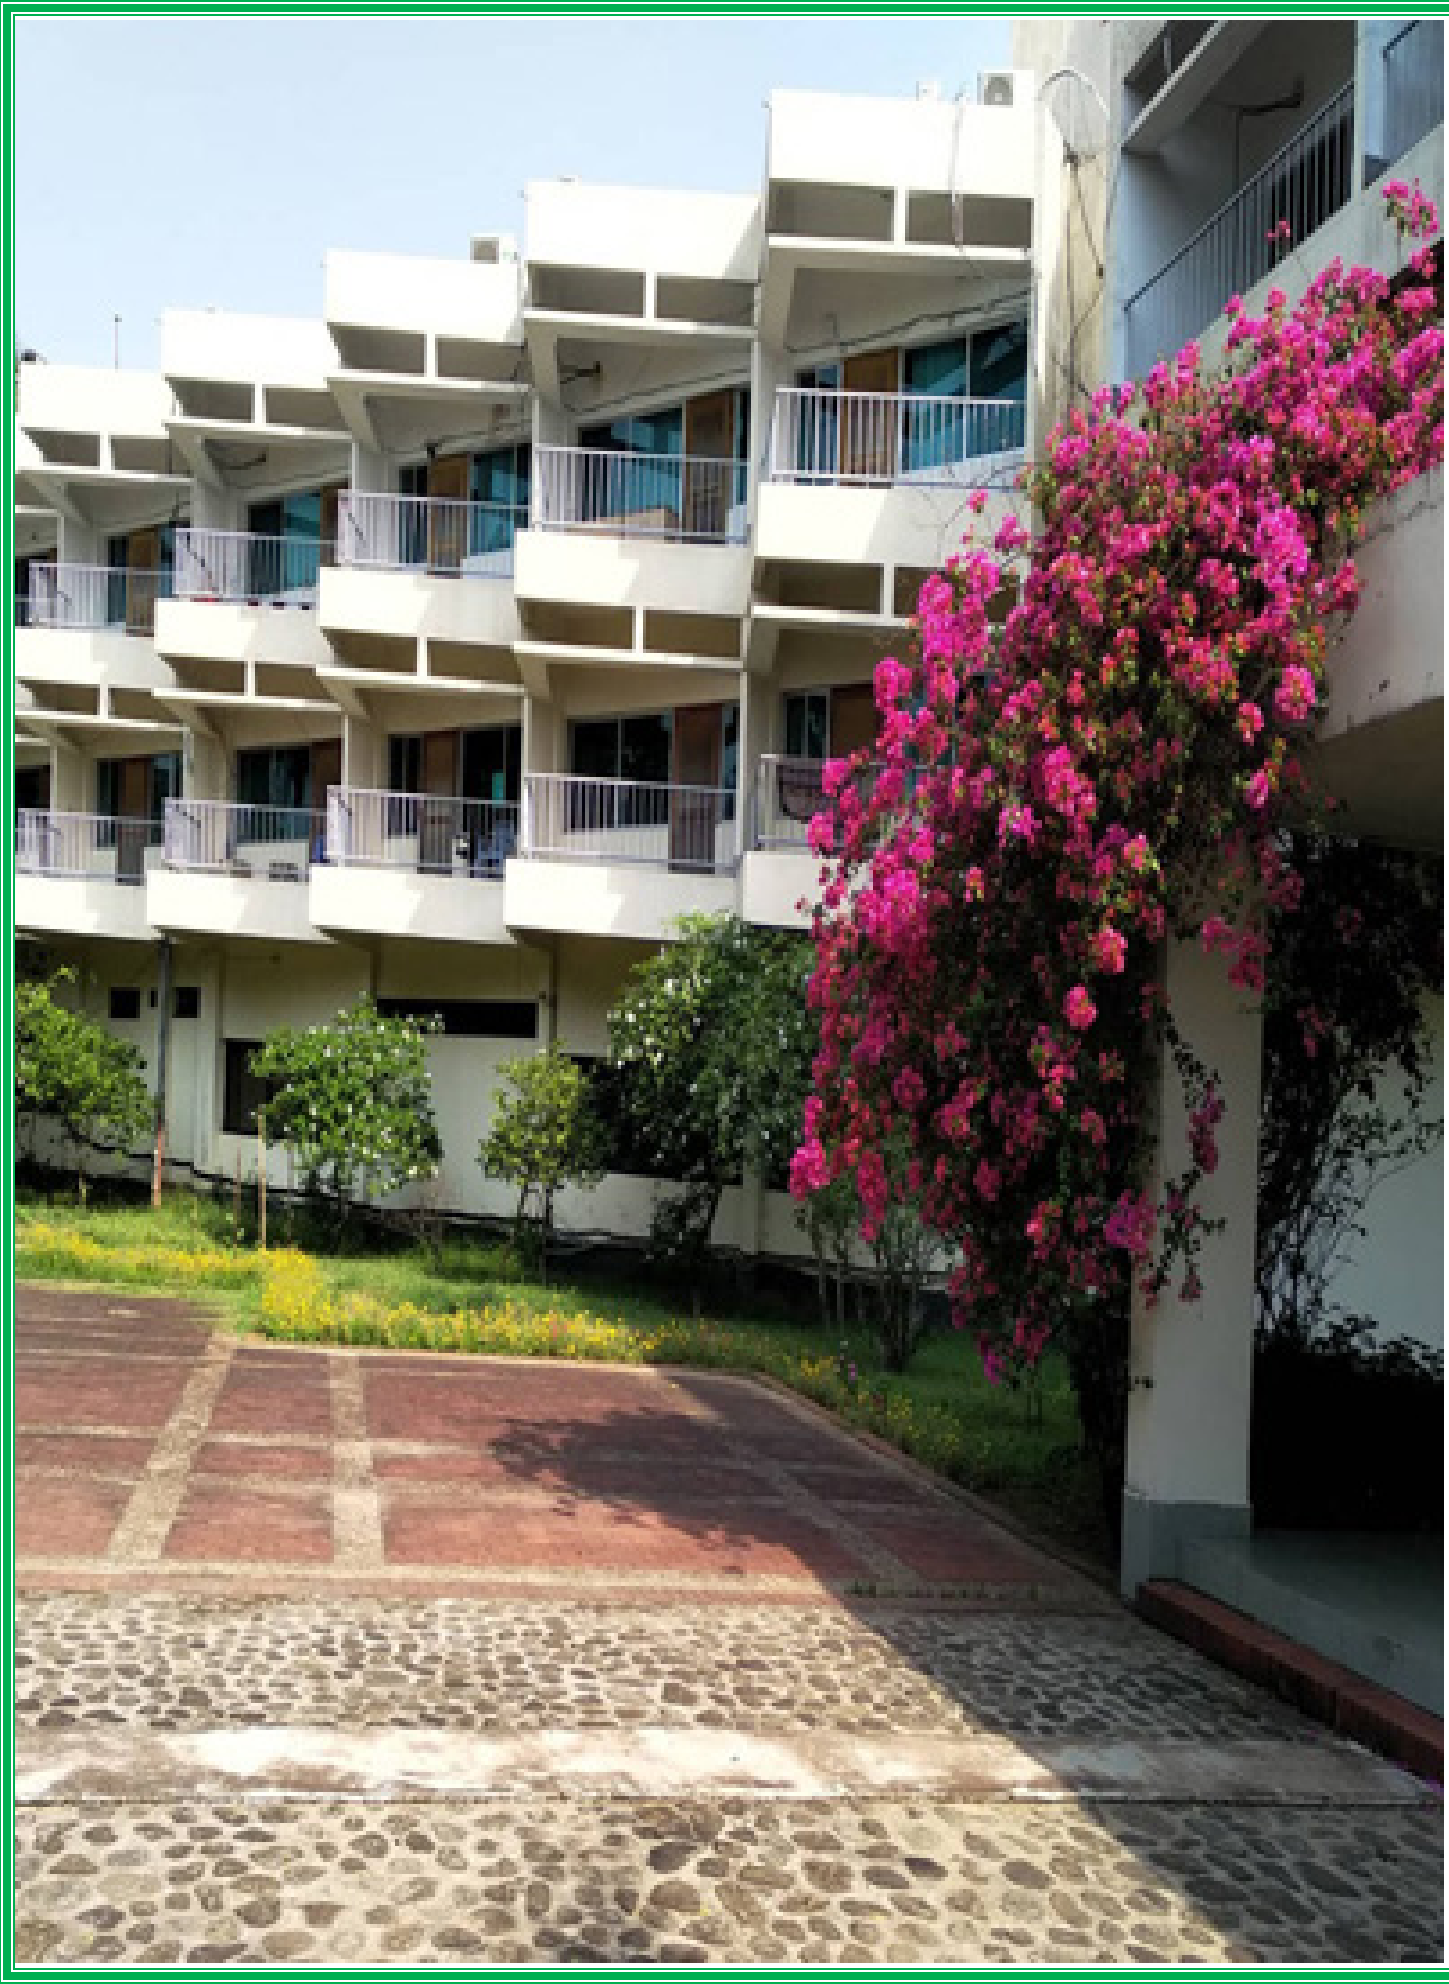

4. Dredging & River Bank Development

A. **Major River Training Projects:** Successfully executed river bank protection and development to prevent erosion and manage water flow.
B. **Land Reclamation & Dredging:** Utilized our 18-inch, 14-inch, and 12-inch dredger fleet for large-scale sand extraction and canal deepening projects.

5. Marine & Specialized Projects

A. **Saltwater Shoreline Protection:** Implemented specialized coastal protection measures using corrosion-resistant materials.
B. **Dredging Operations:** Completed numerous "Sweet Water" and "Salt Water" dredging assignments for both private and public sectors.

Equipment & Machineries

ABDUL MATIN LIMITED

1st Class Govt. Contractor & General Order Supplier

LIST OF MACHINERIES, EQUIPMENT AND VEHICLES IN WORKING ORDER NOW OWNED BY ABDUL MATIN LTD.

SI. No	Name	Nos/set /Sqm	Capacity	Condition (New, good, poor)	Value of Equipment Tk. in Lac
01.	Cast-in-situ pile set	2	-	Good	10.00
02	Concrete Mixture Machine With Hopper	8	$0.20m^3/0.40m^3$	Good	7.20
03.	Vibrator (Electric & Diesel)	8	1.5"/2"	Good	1.60
04.	Generator (Diesel/ Electrical)	2	5KVA/10KVA	Good	3.5
05.	Pump Machine Electric & Diesel	6	1.5/2 HP	Good	.25
06.	Rope Hoist	1	-	Good	4.50
07.	Vehicles (Truck, Pickup, etc.)	4	5/1 .5 Ton	Good	7.5
08.	Generator	1	05 KVA	Good	2.00
09.	Leveling instrument	2		Good	1.5
10.	Steel Shuttering Materials with adjustable props.	2500 Sqm		Good	25.00
11.	Steel Scaffolding martials	600 Sqm	-	Good	10.00
12.	Welding set	2	5HP	Good	.20
13.	Pilling Rig	2 set		Good	20.00
14.	Mechanical Compactor / Power rammer	2		Good	1.5
15.	Electric Drill Machine	2		Good	.20
16.	Diesel Water Pump	2	3 suction	Good	.25
17.	Pipe Daises	4	1.5"/4"	Good	.40
18.	Slum Cone	6		Good	.10
19.	Tube-well set to ensure water supply	1 set		Good	.15
20.	Electrical Tool box	1 set		Good	.10
21.	Earth excavator (mechanical)	1		Good	30.00
22.	Safety Bells	20		Good	2.00
23.	Safety Helmets	20		Good	.50
24.	Steel Phera	35		Good	.70
				Total value = Tk.	**129.15**

This is to certify that Abdul Matin Ltd. 25/1, East Nayatola, Moghbazar, Dhaka-1217. Owns the Machineries, equipment and vehicles noted in serial I to 24 in the above chart.

Dredger Information

Dredging & Marine Machinery Inventory

Abdul Motin Group maintains a robust fleet of high-capacity dredging machinery, essential for river training, land reclamation, and large-scale water management projects. Our equipment is categorized by specialized utility to ensure efficiency in both fresh and saltwater environments.

1. Cutter Suction Dredgers (CSD)

We operate a versatile range of dredgers capable of handling diverse geographical terrains:

- **18-Inch Heavy-Duty Dredger:** Optimized for large-scale sand extraction and deep-river dredging.
- **14-Inch Standard Dredger:** Our primary workhorse for mid-range canal and river development.
- **12-Inch Compact Dredger:** Designed for precision work in smaller waterways and urban drainage projects.

2. Specialized Environment Equipment

Our fleet is equipped to handle varying water salinity and conditions:

- **Sweet Water Dredging Units:** Specifically tuned for inland river systems and freshwater lakes.
- **Salt Water Dredging Units:** Reinforced with corrosion-resistant components for coastal and estuarine projects.

3. Support & Auxiliary Machinery

To complement our dredging operations, the group utilizes a variety of road and highway construction machinery:

- **Earthmoving Equipment:** High-capacity excavators and bulldozers for shoreline shaping.
- **Transport Logistics:** A dedicated fleet of tugs and barges for material transport.
- **Roads & Highways Machinery:** Specialized equipment for integrated infrastructure projects following dredging and reclamation.

18-Inch Heavy-Duty Dredger:

14-Inch Standard Dredger

12-Inch Compact Dredger:

Equipments

Earthmoving Equipment

1. Crawler Excavators

- **Description:** Heavy-duty machines that run on tracks (crawlers) rather than wheels. They are used for massive digging projects, quarrying, and heavy lifting.
- **Key Feature:** Exceptional stability on soft or uneven terrain.

2. Wheeled Excavators

- **Description:** Similar to crawler excavators but mounted on rubber tires.
- **Key Feature:** High mobility; they can be driven on paved roads between jobsites without damaging the asphalt.

3. Mini Excavators

- **Description:** Compact excavators designed for tight spaces, landscaping, and small utility jobs.
- **Key Feature:** Small footprint and "zero tail swing," allowing them to work near walls.

4. Backhoe Loaders

- **Description:** A versatile machine with a loader bucket on the front and an excavator arm (backhoe) on the rear.
- **Key Feature:** A "Swiss Army Knife" of construction; it can both dig and move material.

5. Bulldozers

- **Description:** Powerful tracked machines equipped with a wide metal blade at the front.
- **Key Feature:** Used for pushing massive amounts of soil, sand, or rubble and for rough grading.

6. Motor Graders

- **Description:** Long machines with a blade located between the front and rear axles.
- **Key Feature:** Used for "finish grading" to create a flat, level surface for road construction.

7. Scrapers

- **Description:** Machines used to "scrape" a thin layer of earth into a hopper (bowl) and transport it.
- **Key Feature:** Combines digging, loading, and hauling into one machine for large-scale earthworks.

8. Skid Steer Loaders

- **Description:** Small, engine-powered machines with lift arms used to attach various tools.
- **Key Feature:** Can turn within their own footprint by locking one side of the wheels (skidding).

9. Wheel Loaders

- **Description:** Large four-wheeled machines with a massive front-mounted bucket.
- **Key Feature:** Used for scooping material (gravel, dirt) and loading it into dump trucks.

10. Trenchers

- **Description:** Machines designed specifically to dig long, narrow, deep trenches for pipes or cables.
- **Key Feature:** Uses a "chainsaw-like" metal belt or a large spiked wheel.

11. Dragline Excavators

- **Description:** Massive machines used in civil engineering and open-cast mining.
- **Key Feature:** Uses a system of cables and a winch to "drag" a bucket toward the machine from a distance.

12. Rippers

- **Description:** A heavy, claw-like device attached to the rear of a bulldozer or tractor.
- **Key Feature:** Used to break up hard ground, rock, or frozen earth before digging.

13. Rock Breakers / Hydraulic Hammers

- **Description:** An attachment (usually for an excavator) that acts like a giant jackhammer.
- **Key Feature:** Used to demolish concrete structures or break large boulders into smaller pieces.

Earthmoving Equipment

These are essential for road works, embankments, dam structures, and site development.

Road Construction Equipment

1. Asphalt Batch Plant

Description: A large-scale manufacturing facility that produces hot mix asphalt in "batches." It precisely measures aggregates and bitumen for high-specification projects. **Key Feature:** Offers the highest level of flexibility for changing mix designs frequently.

2. Drum Mix Plant

Description: A continuous-production plant where drying and mixing of the asphalt occur inside a single rotating drum. **Key Feature:** Ideal for high-volume, continuous paving projects where a single mix type is needed for long periods.

3. Asphalt Paver Finisher

Description: The machine that receives hot asphalt from a truck and spreads it across the road surface at a specific thickness and width. **Key Feature:** Uses a "screed" to partially compact and level the material before the rollers arrive.

4. Road Milling Machine (Cold Planer)

Description: Used to remove the top layer of an existing road. It uses a rotating drum with carbide teeth to grind up old asphalt. **Key Feature:** Essential for road restoration; it leaves a textured surface ready for a new layer of asphalt.

5. Bitumen Sprayer

Description: A truck-mounted tank with a spray bar at the rear that applies a thin, even coat of liquid bitumen (tack coat) to the road base. **Key Feature:** Ensures the new asphalt layer bonds properly to the surface below.

6. Chip Spreader

Description: A machine that distributes a uniform layer of aggregate (chips) over a freshly sprayed layer of bitumen. **Key Feature:** Primarily used in "chip sealing" to extend the life of rural or low-traffic roads.

7. Road Sweeper & Mechanical Broom

Description: Heavy-duty brushes mounted on vehicles used to clean the road base of dust, debris, and loose stones before paving. **Key Feature:** Cleanliness is critical; any dust left on the road will prevent the asphalt from sticking.

8. Soil Stabilizer / Recycler

Description: A powerful machine that grinds up the existing soil or old road pavement and mixes it with additives like cement or lime. **Key Feature:** Strengthens the sub-grade (the road's foundation) without having to haul in new materials.

9. Hot Mix Storage Silo

Description: Insulated vertical towers used to store finished asphalt at high temperatures until it is ready to be loaded into trucks. **Key Feature:** Allows the plant to keep running even if trucks are delayed, preventing the mix from cooling down.

Compaction Equipment

1. Vibratory Soil Compactors

- **Description:** Heavy-duty rollers that use a vibrating internal mechanism to settle soil particles.
- **Best For:** Deep compaction of granular soils like sand and gravel. The vibration "shakes" the particles into a tighter fit.

2. Smooth Drum Rollers (Static)

- **Description:** Large rollers with a heavy, flat steel drum. They rely purely on their massive weight (static pressure) to compact the surface.
- **Best For:** Creating a smooth, level finish on asphalt or finishing the top layer of a soil base.

3. Pneumatic Tire Rollers (Multi-Wheeled)

- **Description:** Instead of a steel drum, these have rows of heavy rubber tires. The tires are often staggered to ensure full coverage.
- **Best For:** Sealing the surface of asphalt and providing "kneading" action that improves density on sub-base layers.

4. Tandem Rollers (Double Drum)

- **Description:** Features two smooth steel drums—one in the front and one in the back. Usually, both drums are powered and can vibrate.
- **Best For:** Asphalt paving. It allows the operator to flatten and smooth the hot mix in fewer passes.

5. Sheepsfoot Rollers (Padfoot)

- **Description:** The drum is covered in many "feet" or rectangular protrusions.
- **Best For:** Cohesive soils like **clay**. The feet penetrate the soil to compact from the bottom up, rather than just the surface.

6. Plate Compactors

- **Description:** A walk-behind machine with a flat, vibrating heavy steel plate.
- **Best For:** Tight spaces where large rollers can't reach, such as sidewalk bases, small driveways, or around utility poles.

7. Tamping Rammers ("Jumping Jacks")

- **Description:** A hand-operated machine that delivers high-impact "punches" to the ground using a small foot.
- **Best For:** Narrow trenches or backfilling around foundations where the soil is thick or clay-based.

8. Trench Rollers

- **Description:** Often remote-controlled, these are narrow, dual-drum rollers (usually with padded feet) designed to fit inside deep, narrow excavations.
- **Best For:** Compacting soil over pipes in trenches where it would be dangerous for a human operator to stand.

Concrete Equipment

1. Concrete Batching Plant

- **Description:** A large facility that combines water, air, admixtures, sand, aggregate, and cement.
- **Use Case:** Essential for large-scale projects where massive volumes of consistent, high-strength concrete are required daily.

2. Transit Mixers

- **Description:** Often called "cement trucks," these feature a rotating drum that keeps concrete in a liquid state during transport to the site.
- **Key Feature:** The rotation prevents the aggregate from settling and the mix from hardening prematurely.

3. Concrete Pumps (Boom & Trailer)

- **Boom Pump:** Uses a remote-controlled robotic arm to deliver concrete to high floors or over obstacles.
- **Trailer Pump:** A stationary unit that pumps concrete through a series of hoses laid along the ground.

4. Concrete Placing Boom

- **Description:** A stationary or climbing arm used in conjunction with a pump system.
- **Use Case:** Ideal for high-rise government buildings where the boom stays on the top floor and "climbs" with the structure.

5. Concrete Vibrators (Needle & Surface)

- **Needle (Internal):** A vibrating "poker" dipped into wet concrete to remove air bubbles.
- **Surface (External):** Vibrates the formwork or the top surface to ensure a dense, smooth finish.

6. Power Trowel Machines ("Helicopters")

- **Description:** Machines with rotating blades used to "float" and "finish" large concrete floors.
- **Result:** Creates a smooth, hard-wearing surface—perfect for hospital or guest house corridors.

7. Concrete Screed Machines

- **Description:** A long, vibrating metal straight-edge used to "strike off" excess concrete.
- **Key Feature:** Levels the wet concrete to the exact grade before the finishing process begins.

8. Portable Concrete Mixer Machines

- **Description:** Small, drum-style mixers powered by electric or diesel engines.
- **Use Case:** Best for small-scale repair works or remote sites where a full transit mixer cannot reach.

9. Shotcrete Machines

- **Description:** Equipment that "sprays" concrete at high velocity onto a surface.
- **Use Case:** Frequently used for slope stabilization, tunnel linings, or structural repairs on bridges.

10. Concrete Buckets

- **Description:** Large metal containers lifted by a crane to transport concrete to areas inaccessible by pumps.
- **Key Feature:** Features a discharge gate at the bottom to control the flow into the forms.

11. Rebar Processing (Bending, Cutting, & Threading)

- **Bending Machine:** Shapes steel reinforcement bars into specific angles (stirrups or hooks).
- **Cutting Machine:** Heavy-duty shears that snap thick steel bars to precise lengths.
- **Threading Machine:** Creates threads on the ends of rebar to allow for mechanical couplers.

Bridge Construction Equipment

Bridge construction requires some of the most specialized and high-capacity machinery in the engineering world. These tools are designed to handle immense structural loads and ensure the precision required for long-term safety.

1. Launching Girder (Bridge Launcher)

- **Description:** A massive temporary support structure used to lift and place precast bridge segments or steel girders.
- **Key Feature:** It "walks" forward from one pier to the next, allowing for bridge assembly without the need for ground-based cranes.

2. Segment Lifters

- **Description:** Compact cranes that sit on the already completed portion of a bridge deck.
- **Key Feature:** They lift new segments from a barge or trailer below and hold them in place while they are joined to the structure.

3. Form Travelers

- **Description:** Movable frameworks used in "balanced cantilever" construction.
- **Key Feature:** They support the formwork for pouring concrete segments in-situ (on-site) and move forward as each section hardens.

4. Hydraulic Jacks & Post-Tensioning Equipment

- **Hydraulic Jacks:** High-pressure cylinders used to lift entire bridge spans or adjust bearings.
- **Post-Tensioning:** Heavy-duty pumps and jacks used to pull steel cables (tendons) through the concrete to compress it, significantly increasing its strength.

5. Bearing Installation Tools

- **Description:** Specialized alignment and leveling tools used to place bridge bearings (the interface between the pier and the deck).
- **Key Feature:** Ensures the bridge can safely expand, contract, and move under load.

6. Piling Rig & Rotary Drilling Rig

- **Description:** Tall machines used to create the deep foundations of a bridge.
- **Key Feature:** Rotary rigs use a "kelly bar" and auger to drill deep into the earth to reach bedrock or stable soil layers.

7. Pile Driving Hammer

- **Description:** A heavy weight (diesel or hydraulic) that repeatedly strikes a pre-formed pile to force it into the ground.

- **Key Feature:** Uses high-impact energy to drive steel or concrete piles to a specific "refusal" depth.

8. Sheet Pile Driver

- **Description:** Often a vibratory hammer used to drive interlocking steel sheets into the ground.
- **Key Feature:** Used to create "cofferdams"—watertight enclosures that allow engineers to work on bridge piers in the middle of a river.

9. Casing Oscillator

- **Description:** A powerful hydraulic device that rotates and pushes large steel casings into the ground during drilling.
- **Key Feature:** Prevents the borehole from collapsing in unstable or water-logged soil conditions.

Comparison of Foundation Methods

Equipment	Best For	Noise/Vibration
Rotary Rig	Deep, large-diameter bored piles	Low
Pile Hammer	Precast concrete or steel H-piles	High
Vibratory Driver	Sheet piles and sandy soils	Medium

Dredging & Water Works Equipment

Dredging and water works are essential for maintaining navigable waterways, constructing embankments, and managing flood control. This equipment is specifically designed to operate in marine environments where standard machinery would fail.

1. Cutter Suction Dredger (CSD)

- **Description:** A stationary or self-propelled vessel equipped with a rotating cutter head that loosens hard soil or rock.

- **Key Feature:** It sucks up the loosened material using a high-power pump and discharges it via a pipeline to a disposal area or embankment site.
- **Use Case:** Ideal for hard seabed materials and creating new land (reclamation).

2. Bucket Dredger

- **Description:** A vessel equipped with a continuous chain of buckets that scoop up sediment from the bottom.
- **Key Feature:** Highly efficient for removing large volumes of clay or silt in a steady, mechanical process.

3. Suction Dredger (Trailing Suction Hopper)

- **Description:** Works like a giant vacuum cleaner, using a suction pipe to "inhale" loose sand and silt from the water bed.
- **Key Feature:** Often includes a "hopper" (a large hold) inside the ship to store the material until it can be dumped elsewhere.

4. Amphibious Excavator ("Swamp Buggy")

- **Description:** An excavator mounted on sealed, hollow pontoons instead of standard tracks.
- **Key Feature:** It can float and operate in deep mud, marshes, and shallow water where a normal crawler excavator would sink.

5. Floating Pontoon

- **Description:** Modular, buoyant platforms used to support heavy machinery, pumps, or workers on the water.
- **Key Feature:** They can be pinned together to create a stable "floating island" for construction activities.

6. Booster Pump

- **Description:** Powerful pumps installed at intervals along a discharge pipeline.
- **Key Feature:** They provide the extra pressure needed to transport dredged slurry over very long distances (several kilometers) to the shore.

7. Slurry Pipeline System

- **Description:** A network of heavy-duty, abrasion-resistant pipes used to transport the mixture of water and sediment (slurry).
- **Key Feature:** Can be floating (on pontoons) or submerged on the bottom of the water body.

8. Dewatering & Submersible Pumps

- **Dewatering Pump:** Used to remove water from a construction site or cofferdam to allow work "in the dry."

- **Submersible Pump:** Designed to be completely submerged in water; the motor is hermetically sealed.

9. Trash Pumps

- **Description:** A specialized centrifugal pump designed to handle water containing debris, such as twigs, stones, and sludge.
- **Key Feature:** Features a larger "volute" (casing) that allows solids to pass through without clogging the impeller.

Equipment Selection for Dredging Depth

Equipment Type	Max Depth Capability	Best Sediment Type
Amphibious Excavator	Shallow (0–4m)	Soft mud/Swamps
Cutter Suction Dredger	Medium to Deep (up to 25m+)	Hard clay, Rock, Sand
Trailing Suction	Very Deep (up to 50m+)	Loose sand, Silt

Lifting & Material Handling Equipment

Lifting and material handling equipment is the "muscle" of the construction site. For multi-storey government buildings and large-scale infrastructure, these machines ensure that heavy structural components, raw materials, and personnel are moved safely and precisely.

1. Tower Crane

- **Description:** A fixed crane consisting of a vertical mast and a horizontal jib. It is the centerpiece of high-rise construction.
- **Key Feature:** Offers an incredible combination of height and lifting capacity while occupying very little ground space.

2. Mobile Crane

- **Description:** A cable-controlled crane mounted on rubber tires. It can be driven to the job site and set up quickly using outriggers.
- **Key Feature:** High versatility and rapid deployment for various lifting tasks.

3. Crawler Crane

- **Description:** A heavy-duty crane mounted on an undercarriage with a set of tracks (crawlers).
- **Key Feature:** Superior stability on soft ground; unlike mobile cranes, they can "pick and carry" (move while holding a load).

4. Truck Mounted Crane (Hiab)

- **Description:** A smaller crane integrated directly onto a standard truck bed.
- **Key Feature:** Perfect for self-loading and unloading materials (like bricks or pipes) and transporting them to different sites.

5. Gantry & Overhead Cranes

- **Gantry Crane:** A bridge-like structure supported by upright legs that move on rails. Common in bridge segment yards.
- **Overhead Crane:** Fixed to the ceiling or walls of a building (like a warehouse or power plant) to move loads along a horizontal beam.

6. Telehandler (Telescopic Handler)

- **Description:** A hybrid between a forklift and a crane. It has a single telescopic boom that can extend forward and upward.
- **Key Feature:** Can reach into the second or third story of a building to deliver pallets of material.

7. Forklift

- **Description:** A compact vehicle with a power-operated pronged platform at the front.

- **Use Case:** Essential for moving palletized materials around the storage yard or the ground floor of a site.

8. Construction Hoists (Passenger & Material)

- **Description:** A temporary elevator attached to the outside of a building under construction.
- **Key Feature:** Used to transport workers and finishing materials (like drywall or tiles) to upper floors quickly.

9. Chain Pulley Blocks & Winches

- **Chain Pulley:** A manual lifting device used for precision positioning of heavy loads in tight spaces.
- **Winch:** A mechanical device used to pull in (wind up) or let out (wind out) a rope or wire cable, often used for horizontal pulling or vertical lifting in shafts.

Lifting Equipment Comparison Table

Equipment	Mobility	Best Use Case	Max Height
Tower Crane	Fixed	High-rise buildings	Extremely High
Crawler Crane	Low (Slow)	Heavy bridge girders/Soft soil	High
Telehandler	High	Material placement on mid-levels	Medium
Mobile Crane	Very High	Short-term heavy lifts	High

Transportation & Haulage Equipment

Transportation and haulage are the "circulatory system" of a construction project. Whether it is moving bulk earth, transporting delicate bridge segments, or refueling heavy machinery in remote areas, these vehicles ensure the site stays supplied and productive.

1. Dump Trucks & Tipper Trucks

- **Dump Truck:** Generally a heavy-duty off-road vehicle used for hauling huge volumes of earth or rock within a site.
- **Tipper Truck:** A road-legal truck with a hydraulic lifting bed.
- **Key Feature:** The "rear-tip" mechanism allows for the rapid unloading of materials like sand, gravel, or demolition waste.

2. Prime Mover & Low Bed Trailer

- **Prime Mover:** A heavy-duty motorized unit (the "head" of the truck) designed to pull large trailers.
- **Low Bed Trailer:** A trailer with a deck height very close to the ground.
- **Use Case:** Essential for transporting **oversized heavy equipment** (like excavators or bulldozers) under low bridges and through city streets safely.

3. Trailer Trucks (General & Flatbed)

- **Trailer Truck:** A standard tractor-trailer setup for long-distance hauling.
- **Flatbed Truck:** A truck with an entirely flat, open body without sides or a roof.
- **Use Case:** Flatbeds are the primary choice for transporting steel rebar, precast concrete beams, and large pipes that need to be loaded by crane from the side.

4. Water Tanker

- **Description:** A truck fitted with a large tank and a spray bar or hose system.
- **Use Case:** Critical for **dust suppression** on dirt roads and providing the necessary moisture for soil compaction during road construction.

5. Fuel Tanker

- **Description:** A specialized mobile unit used to transport and dispense diesel or petrol.
- **Key Feature:** Operates as a "mobile gas station," going directly to the heavy machinery (like excavators) so they don't have to leave their work area to refuel.

6. Pickup Trucks & Service Vans

- **Pickup Truck:** Light-duty vehicles used by supervisors and engineers for site inspections and moving small tools.
- **Service Van:** A mobile workshop equipped with tools, spare parts, and diagnostic equipment.
- **Use Case:** Used by mechanics to perform on-site repairs and maintenance for the larger fleet.

Haulage Capacity Reference

Vehicle Type	Typical Payload Capacity	Primary Material
Tipper Truck (3-Axle)	15–20 Tons	Sand, Gravel, Asphalt
Articulated Dump Truck	25–45 Tons	Bulk Earth, Rock
Low Bed Trailer	40–100+ Tons	Heavy Machinery, Bridge Girders
Water Tanker	5,000–20,000 Liters	Water (Dust Control/Compaction)

Foundation & Ground Engineering Equipment

Foundation and ground engineering are the "invisible" but most critical parts of any structure. Before a government building or bridge can rise, the soil must be analyzed, stabilized, and reinforced. This equipment ensures the ground can support the massive loads of the finished project.

1. Borehole Drilling & Rotary Rigs

- **Borehole Drilling Machine:** A smaller, often trailer-mounted rig used to drill deep, narrow holes into the earth to collect soil samples or install monitoring equipment.
- **Rotary Rig:** A heavy-duty powerhouse used for "bored piling." It uses a rotating auger or bucket to excavate soil for large-diameter concrete foundations.

2. Core Cutting Machine

- **Description:** A high-speed drill equipped with a hollow, diamond-tipped bit.
- **Use Case:** It "carves out" a cylindrical sample (core) of rock or existing concrete. This allows engineers to inspect the internal quality and strength of the material in a laboratory.

3. Soil Testing & SPT Equipment

- **Soil Testing Kits:** Field tools used to measure moisture content, density, and shear strength on-site.
- **SPT (Standard Penetration Test) Equipment:** A specialized tripod and hammer system that drops a weight to drive a "split-spoon" sampler into the ground.
- **Key Feature:** The number of blows required to drive the sampler tells engineers how "hard" or "soft" the soil layers are at specific depths.

4. Dewatering & Well Point Systems

- **Dewatering System:** A general term for removing groundwater from an excavation site to prevent flooding.
- **Well Point System:** A series of small-diameter wells (well points) connected to a header pipe and a vacuum pump.
- **Key Feature:** It lowers the water table in a specific area, allowing workers to dig foundations in dry soil even if the site is near a river or high water table.

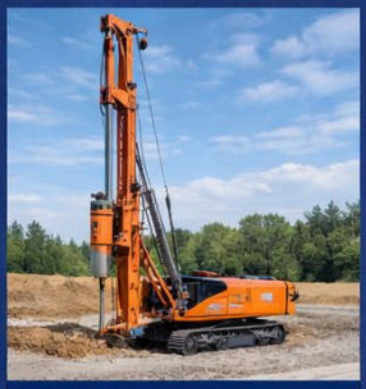

5. Grouting Pump

- **Description:** A high-pressure pump used to inject "grout" (a mixture of water, cement, and sand) into voids or cracks in the ground or rock.
- **Use Case:** Used to stabilize loose soil, seal off water leaks in tunnels, or strengthen the base of a bridge pier.

Survey & Engineering Instruments

Survey and engineering instruments are the "eyes and ears" of a construction project. They ensure that every road, bridge, and building is positioned with millimeter precision and that the materials used meet the strict safety standards required for public infrastructure.

1. Surveying & Alignment Instruments

Total Station

- **Description:** An electronic/optical instrument that combines an electronic theodolite with an electronic distance meter (EDM).
- **Key Feature:** It measures both vertical and horizontal angles as well as the slope distance from the instrument to a particular point.

Theodolite

- **Description:** A precision optical instrument for measuring angles between designated visible points in the horizontal and vertical planes.
- **Key Feature:** While largely replaced by Total Stations for data logging, it remains a fundamental tool for manual angle measurement.

Auto Level & Laser Level

- **Auto Level:** Used to establish or verify points in the same horizontal plane. It is used with a graduated staff to measure height differences.
- **Laser Level:** Projects a constant rotating beam of light to create a perfectly level "reference plane" across a large site.

GPS / GNSS Survey Equipment

- **Description:** Uses satellite signals to provide highly accurate geographic coordinates (latitude, longitude, and elevation).
- **Use Case:** Essential for "staking out" the path of long highways or remote bridge locations where traditional landmarks are unavailable.

Drone Survey System

- **Description:** Unmanned Aerial Vehicles (UAVs) equipped with high-resolution cameras or LiDAR.
- **Use Case:** Used to create 3D maps, calculate "cut and fill" earthwork volumes, and inspect hard-to-reach bridge spans.

2. Quality Control & Testing Equipment

Concrete Cube & Compression Testing Machines

- **Description:** Hydraulic presses used to crush cured concrete samples until they fail.
- **Key Feature:** Measures the "Compressive Strength" of the concrete to ensure it can handle the weight of the building or bridge.

Slump Test Apparatus

- **Description:** A simple metal cone (Frustum) used to measure the "workability" or consistency of fresh concrete before it is poured.
- **How it Works:** If the concrete "slumps" too much, it is too wet; if it doesn't slump at all, it is too dry.

Soil Compaction Test Kit

- **Description:** Tools (like the Proctor Mold and Rammer) used to determine the relationship between soil moisture and density.
- **Use Case:** Ensures the road base has been compacted enough to prevent future sinking or "potholes."

INDEPENDENT AUDITORS' REPORTS TO THE SHAREHOLDERS OF ABDUL MATIN LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **ABDUL MATIN LIMITED** which comprises the Statement of Financial Position as at 30 June 2019, and the Statement of Comprehensive Income, Statement of Changes in Equity, Statement of Cash Flows and notes to the financial statements including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 30 June 2019, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs), the Companies Act 1994 and other applicable laws and regulations.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with ethical requirement that are relevant to our audit of the financial statements in Bangladesh, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with Governance for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs, the Companies Act 1994 and other applicable laws and regulations and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

SHIRAZ KHAN BASAK & CO.
CHARTERED ACCOUNTANTS
(An associate firm of D. N. Gupta & Associates)

R. K. TOWER (LEVEL -10 & 6)
86, Bir Uttam C.R. Datta Road
(312, Sonargaon Road), Dhaka-1205
Tel :88-02-9635139, 88-02-9673597
Mobile :01552-575775, 01552638228
E-mail :shiraz_fca@yahoo.com
Website :www.shirazkhanbasak.bd.com

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

In accordance with the Companies Act 1994, we also report the following:

a) we have obtained all the information and explanation which to the best of our knowledge and belief were necessary for the purpose of our audit and made due verification thereof;

b) in our opinion, proper books of account as required by law have been kept by the Company so far as it appeared from our examination of those books; and

c) the Statement of Financial Position and Statement of Comprehensive Income dealt with by the report are in agreement with the books of account.

d) expenditure was incurred for the purpose of the company's business.

INDEPENDENT AUDITORS' REPORTS TO THE SHAREHOLDERS OF ABDUL MATIN LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **ABDUL MATIN LIMITED** which comprises the Statement of Financial Position as at 30 June 2020, and the Statement of Comprehensive Income, Statement of Changes in Equity, Statement of Cash Flows and notes to the financial statements including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 30 June 2020, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs), the Companies Act 1994 and other applicable laws and regulations.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with ethical requirement that are relevant to our audit of the financial statements in Bangladesh, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with Governance for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs, the Companies Act 1994 and other applicable laws and regulations and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

SHIRAZ KHAN BASAK & CO.
CHARTERED ACCOUNTANTS
(An associate firm of D. N. Gupta & Associates)

R. K. TOWER (LEVEL-10 & 6)
86, Bir Uttam C.R. Datta Road
(312, Sonargaon Road), Dhaka-1205
Tel :88-02-9635139, 88-02-9673597
Mobile :01552-575775, 01552638228
E-mail :shiraz_fca@yahoo.com
Website :www.shirazkhanbasak.bd.com

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

In accordance with the Companies Act 1994, we also report the following:

a) we have obtained all the information and explanation which to the best of our knowledge and belief were necessary for the purpose of our audit and made due verification thereof;

b) in our opinion, proper books of account as required by law have been kept by the Company so far as it appeared from our examination of those books; and

c) the Statement of Financial Position and Statement of Comprehensive Income dealt with by the report are in agreement with the books of account.

d) expenditure was incurred for the purpose of the company's business.

INDEPENDENT AUDITORS' REPORTS TO THE SHAREHOLDERS OF ABDUL MATIN LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **ABDUL MATIN LIMITED** which comprises the Statement of Financial Position as at 30 June 2021, and the Statement of Comprehensive Income, Statement of Changes in Equity, Statement of Cash Flows and notes to the financial statements including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 30 June 2021, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs), the Companies Act 1994 and other applicable laws and regulations.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with ethical requirement that are relevant to our audit of the financial statements in Bangladesh, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with Governance for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs, the Companies Act 1994 and other applicable laws and regulations and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Approach and Methodology of Work

APPROACH AND METHODOLOGY OF WORK.

Immediately after the issuance of letter of intent / work order, the "Home Office" will arrange simultaneously the following:

01. Mobilization of site organization (field office).

02. Study of drawing's & documents, preparation of site facilities and approval of the same from the authority.

03. Construction Schedule and its approval.

04. Financial arrangement.

05. Mobilization of equipment, tools & plants and survey arrangements.

The field's office will start the following operation without any delay:

01. Arrangement of site facilities.

02. Deployment of Man Power

03. Starting of construction activities related to the project as per approved construction schedule by field office with specified quality control.

04. Monitoring and solving of instantaneous major problems by interrelation between field and home office minor problems by field office.

05. Financial invoice preparation, re-scheduling of activities as per necessity.

The detail quantity assurance / quality control will be as per following methodology:

Managing Director
Abdul Matin Ltd.

Narrative Description of Site Organization Chart :

The proposed site organogram has been constituted with an aim employ and efficient staff to handle the project. The responsibilities of the members of the staff and the key personnel is enumerated below.

1. **Project Manager :**

   The Project Manager is solely responsible for overall management of the work. He will assign jobs to all the members of the staff. He is also responsible for the co-ordination with the Department and Consultant, and also to attend the periodical meetings. He will communicate with the department and consultant submit periodical work programme, progress report, Invoice etc.

2. **Project Engineer**

   Project Engineer is the key technical person of the work. He is responsible for overall execution of the projects as per terms of contract and technical specifications. The projects as per sits organogram will be under his direct command. He will attend the owners representative for all technical affairs. He will be held responsible for the overall execution of the job maintaining the pro-rata progress as per scheduled progress and Resident Engineer will assist him to full fill the assignment.

3. **Site Engineer :**

   Site Engineer will be responsible for the selection of construction materials to carry out laboratory and field tests, to confirm the specifications and also to maintain the procurement and consumption schedule. The Site Engineer will have the responsibility listed below in two sub sectors (1) Supervision (2) Equipment. They are responsible to execute field activities in the above sectors.

4. **Supervisor :**

   The work Supervisor will be responsible for overall labour management of the work. He will assign job to the foremen and other sub-ordinate staff for strict supervision of the items of works.

5. **Other Staff :**

   Other member of the staff like Store Keeper, Store helper, Surveyors, Surveyor helper, Master Roll workers will execute their responsibility assigned by their higher field personnel listed above.

Managing Director
Abdul Matin Ltd

QUANTITY ASSURANCE / QUALITY CONTROL PROGRAM

1. General

(1) **Abdul Matin Ltd.** Quantity Assurance and quality Control services are intended to ensure the quality of all the work including fabrication and construction activities keeping strict conformity with project requirements as well as applicable Codes and Standards.

(2) Our QA & QC system is flexible and can be adopted to suit the requirements of wide variety of projects and accommodate any scope of engineering fabrication and field construction.

(3) The QA & QC department consists of such personnel who are specialized in Quality and quantity Assurance Engineering, Vendor Surveillance, Site Inspections, Testing and Constructions and etc. Such specialists can be provided either individually or through various combinations depending upon the project's requirements and budget.

(4) While key personnel are assigned to provide exclusive services to a project, our Quality Assurance Engineering Department forms an independent team that audits and reviews the work quality of project to make sure that all efforts are performed in the manner established by project procedures and particulars.

(5) The QA & QC program will be implemented with control elements from the inception of the project in order to :

- define what must be controlled, and executed
- establish control level/criteria and execution

2. Organization Structure

(1) The organization is to be operated with sufficient authority and independence from such factors as cost, schedule, construction and testing.

(2) The QA & QC department shall be operated by the direction of the QA & QC Manager, who will report directly to the Project Manager, as far as QA & QC is concerned, however, the Project Manager shall have a direct access to he company's QA & QC Department which directly reports to the Technical Director of the company.
This line of reporting provides sufficient freedom to identify problems related with quality Control/Quantity Assurance and to initiate, recommend and provide solutions thereof.

(3) **The Proprietor shall take responsibility for:**
(a) **Abdul Matin Ltd.** Corporation overall quality assurance policy, direction strategy and operation.

(b) Delegation of the authority to the Project (in charge of QC) for the general control of all activities in connection with QA & QC in all projects.

(4) **The Project Manager–in-Charge shall take responsibility for:**
(a) Presiding the management review meeting to assess the adequacy and effective implementation of Quality Control System.
(b) Recommending resolutions to problems related to Quality Control to the Project Engineer.

Managing Director
Abdul Matin Ltd.

(5) The Project Engineer shall regularly report to the Proprietor on matters related with quality control and shall be free to stop work or provide restrictive controls and shall take responsibility for:

(a) Controlling overall site activities including production, installation, purchase requisition specification and others required for the execution of project.

(b) Administering and providing directions to subordinates for construction activities in accordance with construction matters.

(c) Overseeing the procurement of specified products and services from supplier designated or recommended by the Owners in accordance with the contract documents for the project.

(d) Establishing and maintaining the Quantity Assurance/Control System and evaluating its effectiveness and adequacy by at least annual audit.

(e) Identifying site conditions adverse to he quality of works and implementing the necessary corrective measures.

(f) Initiating the training after qualification of auditors and inspection personnel.

(6) The QA & QC Manager shall maintain liaison with engineers under the close working relationship and co-ordination with them and shall report test results, as soon as possible, to the Project Engineer.

(a) Monitoring all site activating affecting and the quality of work by means of tests, inspections and surveillance.

(b) Identifying problems related with the quality of works.

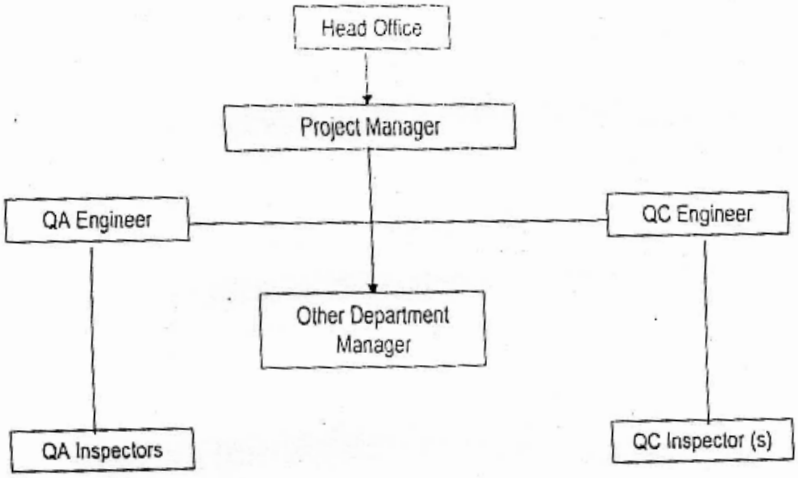

(c) Initiating, recommending or providing solutions to problems related with quality, and subsequently verifying the implementation of such solutions.

(d) Assuring that further processing delivery, installation, or use are controlled until proper disposition.

(e) Training and qualification of site personnel in charge of inspection and testing.

Managing Director
Abdul Matin Ltd

(7) THE TYPICAL QA & QC ORGANIZATION IS AS FOLLOWS:

3. **QA /QC Program**

A specific QA/QC Program will be established so as to ensure that the project requirement will be met with respect to all elements of design, material procurement and services acquisition, fabrication, assembly, shipping, installation, and all other project activities. This plan shall record for all activities affecting quality of works. These will be promoted and monitored by an internal system of project audits conducted by a QA/QC group dedicated to this specific effort. The following QA/QC activities will be generally performed but subject to changes following the specific requirements of particular projects.

(1) Organization and responsibility

QA /QC personnel will be delegated with authority, freedom and functional independence for cost and schedule to ensure satisfactory completion of QA /QC activities.

(2) Control of Documents

Control procedures concerning issuance and maintenance of approved project documents including vendor documents and field modification drawings which affect the performance of QA/QC activities will be designed to ensure that those documents and changes are to be distributed at the required location where applicable work is being performed. Following activities will be performed in this regard:

a. Documentation of Procedures
b. Receipt of various documents
c. Distribution of Documents
d. Maintaining records
e. Revision and changes
f. Reporting

Managing Directo.
Abdul Matin Ltd

(3) **Design Control**

Design of various equipment / component of mechanical devisees will be make in compliance with applicable specifications. The QA/QC Engineer and engineers will ensure and review whether the work in progress meets the requirements of design, size, standard criteria based on the conditions set forth in the specification with respect to standard, size, manufacturing and installation.

(4) **Procurement Control**

To secure the selection and procurement of the correct materials / equipment for a project, the control activities such as the selection of samples, the sting inquires, safety measures, inspections and all other required means shall be carefully taken and keenly examined throughout the whole procedures of procurements as follows:

a. Inquiry and Selecting the competitive supplier
b. Preparation and issuance of Purchase Orders
c. Shipment of Materials / Equipment
d. Unloading
e. Storage

(5) **Inspection and Testing**

The objective of inspection and testing it to ascertain that equipment and materials are manufactured and erected strictly in accordance with QA/QC program as well as the purchaser's data sheets, drawings, specifications and other requirements attached to the purchase orders. The following activities shall be undertaken prior to or after inspection and testing purpose:

a. Identification of characteristics and activities to be inspected.
b. Preparation of the check – list
c. Identification of the individuals or groups responsible for performing the inspection and test.
d. Pre-setting up of the acceptance and rejection criteria and the method of inspection/test.
e. Recording and maintaining evidences of inspection / test results.
f. Inspection and test status shall be clearly indicated by means of stamped marking, tags, levels, routing cards or other suitable means of identification.
g. Reporting the inspection / test results to the Project Engineer.

(6) Defects Control

Defects on inspected items shall be documented and promptly reported tot he appropriate manager for information and correction action as follows:

a. All reports on defective items shall be maintained in an open file until resolved by the concerned department through corrective actions and satisfactorily re-inspected by Quality Control group.
b. Equipment and materials received on the site shall be inspected by QC inspector in accordance with the approved procedures and the requirements of the contract specifications.
c. The QC inspector shall tag all defective items with a hold tag and simultaneously initiate the action required to prepare the related reports.

Managing Directo
Abdul Ma

d. When the remedial measures on defective items has been completed, a follow-up inspection shall be performed.
e. Furthermore, QA inspector shall order the suppliers / subcontractors to sufficiently establish and implement corrective system for the defective (or possibly defective) items already (or to be) supplied or installed by them.

Daily Inspection and Test Records

The daily inspection report shall be the basic documentation for recording results of surveillance inspections and quality control tests performed. The report may be supplemented by test reports, photographs, sketches, field and change order acceptance and other appropriate information as required, to make the report complete and accurate.
Master log of all activities plus any further necessary inspections shall be entered upon a prepared sheet subdivided into the following three categories.

- Preparatory Inspection
- Initial Inspection
- Follow-up Inspection

As the actual inspection is made, the date and initials of the inspecting party shall be inserted in appropriately designated spaces.
This master log will be upgraded monthly for the resident engineer of client.

(7) Corrective Action

Efficient corrective actions will be taken in a timely manner to ensure prompt correction of unsatisfactory conditions. The versatility of our personnel and procedures enable us to provide the capability to perform a board range of efforts for a variety of clients. Engineers assigned to the project have at their disposal the experts, who have extensive knowledge in design and construction quality requirements for all engineering disciplines.

(8) Other Activities

Besides the above activities, our QA/QC Team prepares a preliminary index for the quality control program which is to be submitted after the award of contract as follows:

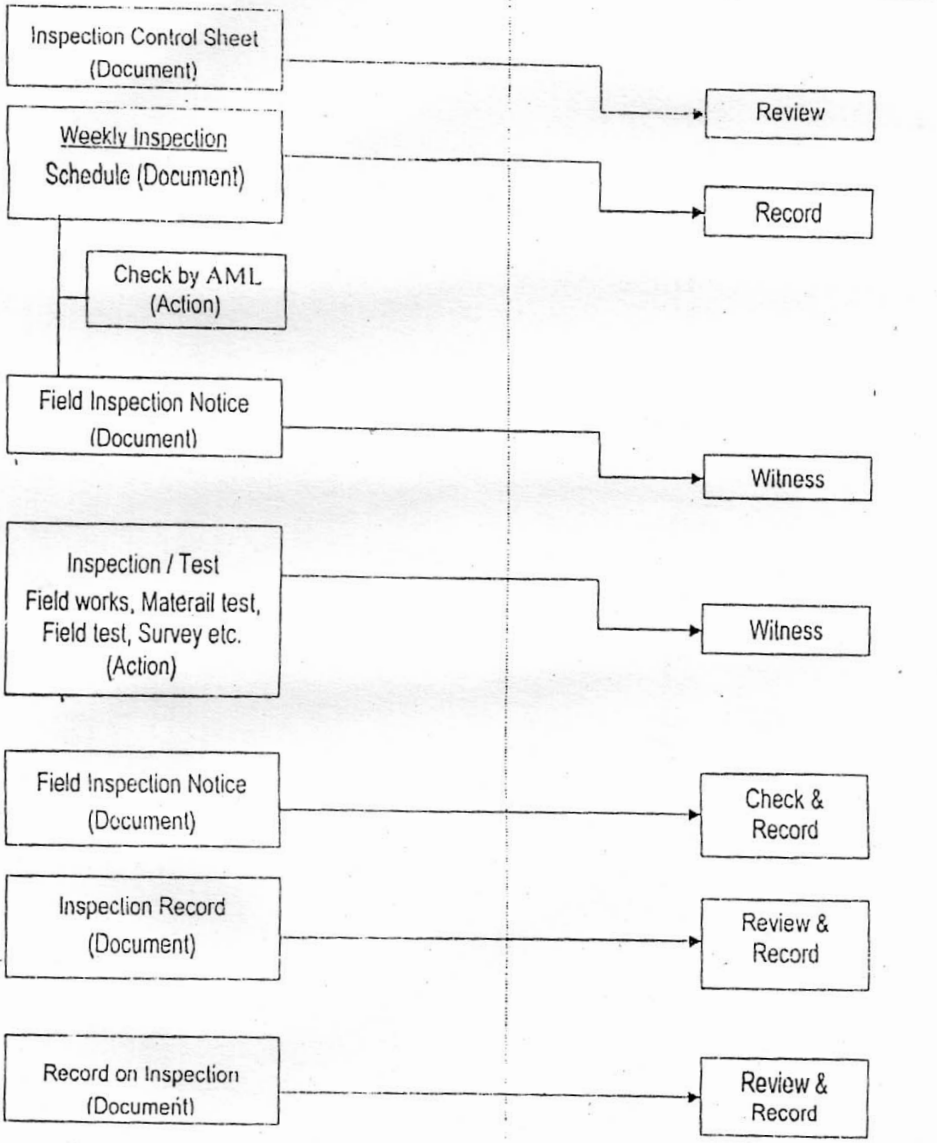

a. To perform sufficient inspection and tests of all items of work including that of subcontractors, to ensure conformity to applicable specifications and drawings with respect to the materials, workmanship, construction, finish, functional performance and identification.
b. To specifically provide the survey and tests required in the technical provisions of the contract specifications.
c. To provide controls to cover all construction activities including both on-site and off – site fabrications.
d. To provide controls to ensure that all construction activities are being kept in accordance with the proposed construction sequence.
e. To provide at least three phases of inspection for all definable features of works as follows:

- Preparatory Inspection
- Initial Inspection
- Follow – up Inspection

Work Flow Diagram for Field Quality Control Civil Works of DAP – 2 Plant Project

Managing Director
Abdul Matin Ltd.

Proposed Source of Man Power

Project Manager, Project Engineer, Site Engineer Supervisor etc. and all Skill. Semi-skill and Un-skill worker will be employed form Bangladesh. Expatriate works will be engaged in case of requirement from foreign countries.

Functional Interrelation between Field & Home Office

The Project Manager shall fully responsible for the project management to achieve the target job as per construction schedule, quality control, procurement of materials, deployment of manpower, equipment, tools & plants etc. necessary for the job through his proper organized personnel's.

He shall regularly communicate with the Proprietor through respective Directors responsible for technical, financial & execution system.

The Proprietor empowered from board of directors and having necessary consultation with financial and legal advisor shall delegate required decisions to respective directors, then the Project Engineer shall have the same form them. The Proprietor will discuss the crucial matters regarding the project in the meeting of board of directors and the evaluated decision will be implemented by him through other directors. He shall consult his advisors if felt necessary.

Technical director shall held responsible for necessary communication with proprietor for any technical obligation of the project and that to be delegated to the Project Engineer. In the same way the financial and executive directors shall held responsible for their respective work.

Now the Project Engineer shall imply the decisions as deemed necessary for the project, shall apply his power to complete any job in hand with the help of his field organization.

Abdul Matin Ltd

Financial Proposal

1. Projected Income Statement (2026 to 2030)

Values in Crore Taka (Cr)

Particulars	2026	2027	2028	2029	2030
Revenue	**350.00**	**500.00**	**650.00**	**800.00**	**1,050.00**
Cost of Goods Sold (approx. 72%)	(252.00)	(360.00)	(468.00)	(576.00)	(756.00)
Gross Profit	**98.00**	**140.00**	**182.00**	**224.00**	**294.00**
Admin & Marketing Expenses	(17.50)	(25.00)	(32.50)	(40.00)	(52.50)
Bank Expenses (4% Avg.)	**(14.00)**	**(20.00)**	**(26.00)**	**(32.00)**	**(42.00)**
Profit Before Tax	**66.50**	**95.00**	**123.50**	**152.00**	**199.50**
Income Tax (Estimated 27.5%)	(18.29)	(26.13)	(33.96)	(41.80)	(54.86)
Net Profit After Tax (NPAT)	**48.21**	**68.87**	**89.54**	**110.20**	**144.64**
NPAT Margin (%)	**13.77%**	**13.77%**	**13.77%**	**13.77%**	**13.77%**

2. Financial Strategy for Escalation

- **Revenue Transformation**: Achieving **350Cr** in 2026 requires a massive increase from the **30.58 million** revenue reported in 2021. Abdul Matin will secure major national infrastructure contracts for "iron and steel structures" and "prestressed concrete products" as outlined in its nature of business. Nevertheless, Imports will also be an added venture within the shortest period of time.
- **Bank Expense Management**: Bank Expense will be between **3%–5%** range. The projection uses **4%** of revenue to cover interest on massive working capital loans and bank charges.
- **Tax Compliance**: Current tax is calculated based on taxable profit for the year. We have applied a standard corporate rate to ensure the final **12%–15%** margin is strictly "After Tax."
- **Asset Base Requirement**: The 2022 Statement of Financial Position showed only Tk. 1.93 million in Property, Plant & Equipment. To support a **1,050Cr** turnover by 2030, a significant portion of the profits must be reinvested into **"Machinery & Equipment" and "Vehicles".**

3. Impact on Shareholders' Equity

- **Retained Earnings**: The company's opening retained earnings of Tk. 64.53 million will grow exponentially. By 2030, the accumulated equity will allow for significant "Share Money Deposits" or capital restructuring.
- **Going Concern**: This aggressive growth plan reinforces the "Going Concern" basis by ensuring the company has more than adequate resources for the foreseeable future.

Projected Balance Sheet: This Sheet will project how the Total Assets (A+B) will grow to support a 1,050Cr revenue.

1. Projected Balance Sheet (2026 to 2030)

Values in Crore Taka (Cr)

Particulars	2026	2027	2028	2029	2030
Assets					
Non-Current Assets (PPE)	55.00	85.00	110.00	145.00	190.00
Current Assets (Inventory, Receivables, Cash)	165.00	225.00	290.00	365.00	480.00
Total Assets	**220.00**	**310.00**	**400.00**	**510.00**	**670.00**
Equity & Liabilities					
Share Capital & Reserves	114.00	183.00	272.00	382.00	527.00
Non-Current Liabilities (Long-term Loans)	45.00	60.00	55.00	45.00	40.00
Current Liabilities (Trade Payables/STD)	61.00	67.00	73.00	83.00	103.00
Total Equity & Liabilities	**220.00**	**310.00**	**400.00**	**510.00**	**670.00**

2. Strategic Reconfiguration of the Balance Sheet

- **Asset Growth**: The "Property, Plants & Equipment" must grow from the audited Tk. 1,937,580 to **190Cr** by 2030 to facilitate high-volume manufacturing of steel structures and concrete products.
- **Working Capital Management**: Current assets (primarily Bills Receivable and Inventory) will become the largest component of the balance sheet to manage the revenue cycle of **350Cr to 1,050Cr**. In 2022, inventory was recorded at Tk. 12,616,579.
- **Equity Strengthening**: The Net Profit After Tax (NPAT) of **12–15%** will be reinvested into the company. This will cause the "Retained Earnings" which were Tk. 64,534,532 in 2022 to become the primary driver of the company's net worth.
- **Debt Strategy**: While the company had a Tk. 5,531,437 bank loan in 2021 that was settled by 2022, a new long-term debt structure is introduced in this proposal to fund the massive "Non-Current Asset" acquisition in Year 1 and Year 2.

3. Key Financial Ratios & Health

- **Debt to Equity Ratio**: Projected to remain healthy (below 1.0) as the high profit margins (12–15% NPAT) quickly build up internal reserves.
- **Current Ratio**: Target of **1.5 to 2.0** to ensure the company can meet its "Current Liabilities" which were only Tk. 25,000 in the 2022 audit.
- **Asset Turnover**: The plan targets high efficiency, utilizing the new PPE to generate revenue at a ratio of approximately **5.5:1** by 2030.

4. Risk Mitigation for 1000Cr+ Operations

- **Internal Control**: Management of Abdul Matin will implement robust internal controls to prevent fraud or error, as the auditor's report notes that the risk of not detecting fraud is higher due to potential collusion or override of controls.
- **Going Concern**: The audit confirmed that as of June 30, 2022, there were no material uncertainties casting doubt on the company's ability to continue as a going concern. This 5-year plan aggressively capitalizes on that stability.

Property, Plant & Equipment (PPE)

To achieve the production capacity required for a **1,050Cr** turnover, the company will move from its 2022 WDV (Written Down Value) of **Tk. 1.93 Million** to an asset base of **190 Crore** by 2030.

- **Valuation Basis:** Assets are recorded at historical cost less accumulated depreciation. Given the scale, a **Revaluation Model** (per IAS 16) is proposed in Year 3 to reflect the true market value of industrial land and specialized machinery.
- **Capitalization of Borrowing Costs:** Interest expenses incurred during the construction/installation of new concrete-stressing plants will be capitalized into the cost of the asset (per IAS 23) until the plant is operational.
- **Expansion Categories:**
    - **Industrial Land & Factory Buildings:** To house heavy duty steel fabrication units.
    - **Prestressed Concrete Plant & Machinery:** High capacity automated lines for electric poles and bridge girders.
    - **Logistics Fleet:** Heavy duty trailers and cranes for product delivery and on-site installation.
    - **Imports:** Raw Materials and Machineries will be imported from different parts of the world.

Bank Expenses & Credit Facilities

There will be **3 to 5% Bank Expenses**, on an average assumption, its debt to support high volume operations.

- **Term Loan (Non-Current):** A long term facility will be secured to fund the **190Cr PPE expansion**. This will be backed by the first charge on the company's fixed assets.
- **Working Capital / Overdraft (Current):** To manage the **480Cr in Current Assets** (Receivables and Inventory), the company will maintain a revolving credit line.
- **Bank Charges & Interest (3 to 5% of Revenue):**
    - **Interest on Loans:** Estimated at **9 to12% per annum** on utilized limits.
    - **Letter of Credit (LC) Charges:** Essential for importing raw materials (steel/chemicals/machineries etc.) at the scale of **756Cr COGS**.
    - **Bank Guarantees (BG):** Required for participating in large scale government tenders and infrastructure projects.
- **Security:** Collateral will include the existing land, the new machinery, and a personal guarantee from the directors as identified the latest Audit.

Revenue Recognition & Taxation

- **Revenue Recognition:** Following **IFRS 15**, revenue will be recognized upon "Performance Obligation" fulfillment (i.e., when concrete products are delivered or construction milestones are certified).
- **Deferred Tax:** Due to the high volume of PPE acquisition, a significant **Deferred Tax Liability** will arise between the accounting depreciation and the tax depreciation (per 3rd Schedule of IT Act 2023). This is managed to ensure the **Net Profit After Tax** remains strictly within the **12 to 15%** target.

Summary of Funding Requirement (2026–2030)

Requirement	Source of Funds
Initial Capex (2026)	55Cr (Term Loan + Existing Cash)
Working Capital (Peak)	100Cr+ (OD Facility + Internal Accruals)
Equity Growth	Reinvestment of the 13.77% NPAT annually

Strategic 5-Year Expansion (2026–2030)

1. Executive Summary

- **Project Objective:** To scale production of prestressed concrete products and iron/steel structures to meet national infrastructure demand.
- **Investment Goal:** Transition from a 30M BDT revenue base to a **1,050Cr BDT** revenue base by 2030.
- **Target Profitability:** Maintain a strict **12 to 15 % Net Profit After Tax (NPAT)** margin.

2. Revenue & Profitability Roadmap

The following table outlines the hyper growth trajectory required to reach the 1,050Cr milestone.

Fiscal Year	Revenue Target	Net Profit After Tax (12 to 15%)	Dividend/Reinvestment Potential
2026	350 Cr	48.21 Cr	High Reinvestment
2027	500 Cr	68.87 Cr	High Reinvestment
2028	650 Cr	89.54 Cr	Balanced
2029	800 Cr	110.20 Cr	Dividend Eligible
2030	**1,050 Cr**	144.64 Cr	Max Shareholder Value

3. Capital Expenditure (CAPEX) & Asset Base

To support the 2030 revenue, we must build a robust industrial infrastructure.

- **Total Fixed Asset Target (2030):** 190 Crore BDT.
- **Key Investments:**
    - High-grade steel fabrication machinery.
    - Automated concrete pole spinning plants.
    - Land acquisition for regional distribution hubs.
    - Logistics fleet (Cranes and heavy-duty trucks).
    - Importing Raw Materials and Accessories & Machineries.

4. Financing Structure

- **Internal Accruals:** We will utilize its current **Tk. 64.53 million** in retained earnings and reinvest the majority of its 12 to15% annual net profits to fund **growth**.
- **Bank Facilities:**
    - **Term Loans:** Required for the initial setup in 2026.
    - **Working Capital (OD/LC):** To support a COGS of **756Cr** by 2030.
    - **Bank Expense Provision:** Budgeted at **3 to 5% of Revenue** to cover interest, LC commissions, and performance guarantees.

5. Financial Health & Compliance

- **Current Ratio:** Target of **1.5x to 2.0x** to ensure liquidity for operational expenses.
- **Debt Equity Ratio:** Managed to stay below **1.0** by the third year due to high profit retention.
- **Audit & Compliance:** Strict adherence to **IFRS/IAS** and the **Companies Act 1994** to prevent the reporting backlogs seen in the 2022 to 2025 period.
- **Tax Strategy:** Corporate tax is estimated at **27.5%**, with deferred tax accounting used to manage the timing differences of high value asset depreciation.

6. Summery

We, Abdul Matin Limited is positioned to leverage its solid equity base (identified in the 2022 Audit Report) to enter the top tier of Bangladesh's infrastructure suppliers. This proposal demonstrates that with a **13.77% NPAT**, the company can sustainably fund its own expansion while providing significant returns to its shareholders.

Conclusion

Conclusion

Since **1979**, Abdul Matin Group has remained a steadfast pillar of the construction and engineering landscape in Bangladesh. Our journey, spanning over four decades, is a testament to our unwavering commitment to quality, innovation, and national development. From pioneering early infrastructure to deploying a sophisticated fleet of modern dredging and construction machinery, we have consistently evolved to meet the challenges of a growing nation.

As we look toward the future, Abdul Matin Group remains dedicated to maintaining the highest international standards in every project we undertake whether in **Roads and Highways**, **Bridge Engineering**, or large-scale **River Bank Development**. Our legacy is built on the trust of our partners and the resilience of our structures. We invite you to partner with us as we continue to build a stronger, more connected, and more sustainable Bangladesh.
